Helpful Startup Policies from Indian Government

It has long been established that the greatest power of our nation comes from our young age creative minds who are willing to break free from the conventional pattern of employment and establish improved product or service resources in the name of "Startup" business.

By happy chances, the Govt of India has also recognized the tremendous possibilities of the Next-Gen startup wave, and has therefore put in substantial study and investment to bolster the youth with better resources, guidance and financial aid.

Innovation on the Rise

Innovation has perpetually been the point of difference for Indian folks and in the interest of this, Govt has launched several initiatives across the nation to support the new entrepreneurship and to foster a culture of innovation among the youngsters. Moreover, some Government initiatives are specially targeted towards enabling equal opportunities for female entrepreneurs and helping them with appropriate resource and financial help.

The most prominent initiative being the "STARTUP INDIA" movement which was contrived to promote and assist indigenous entrepreneurs through invaluable mentoring and facilitation along their journey towards excellence. Under this initiative, potential startups get to skyrocket their business ideas using various incubation programs and field

expertise.

"The primary motive of Startup India initiative is to build an environment in which startups can innovate and evolve without any obstacles. "In addition to easy funding and resource supply, potential startups can also enroll into various other Govt initiatives like Atal Innovation Mission (AIM), Make in India, Digital India, TREAD and Pradhan Mantri Kaushal Vikas Yojana to access facilitated patent filing, easy compliance norms, relaxed procurement, incubator support, funding support, tax benefits and relaxation of stringent regulatory issues.

Empowering Enterprises with Innovations

Zebronics adds a powerhouse speaker 'Moving Monster 2x7 Plus' to its existing range, a car charger 'ZEB-CC242A2' and Zeb-Zing trolley speaker

Zebronics adds a powerhouse speaker 'Moving Monster 2x7 Plus' to its existing range

Bring colors to life with our powerhouse speaker 'Moving Monster 2x7 Plus'.

Zebronics, India's leading supplier of IT peripherals, sound systems, mobile/lifestyle accessories, and surveillance products has launched a powerhouse speaker dubbed Moving Monster 2x7 Plus for the much added thump so that you can have a party anytime, anywhere.

The speaker is a style statement by itself with RGB lights that will make this speaker a showstopper at any party with its modern design and a powerhouse of every party when it's all about the High fidelity audio.

Holi parties with the Zeb-Moving Monster 2x7 Plus is about to get a lot more trendy especially because it has features like a karaoke function along with a recording feature so you can replay your own singing with music. Apart from karaoke there are features like multi-connectivity options like BT/USB/Micro SD/AUX, with two rings of RGB lights which gives out the ultimate party vibe. The speaker also gives you a complete control by giving you individual controls for volume, bass, treble and comes with a built-in radio too.

Speaking on the newest launch, Mr. Pradeep Doshi, Director – Zebronics says, "Make every special occasion an event with our powerhouse speaker Moving Monster 2x7 Plus that comes with a karaoke feature so that you and your loved ones can make memories."

The speaker is available at leading stores across India.

Zebronics launches a car charger 'ZEB-CC242A2'

Zebronics, India's leading supplier of IT peripherals, sound systems, mobile/lifestyle accessories, and surveillance products adds a new car charger 'ZEB-CC242A2' to its extensive range of mobile accessories.

If you've always been driven, spending most of your commute time on mobile has become a necessity whether it's for entertainment or attending to work calls and schedules after work to have a better head start to next day. With the exceeding internet usage, it's more than a must to have your car equipped with a car charger.

ZEB-CC242A2 is a simple on design car charger that comes with an overall matte finish give it rather a premium look and feel. It has dual USB ports with a total of 2.4A output for effortless charging.

Commenting on the launch of the product, Mr. Pradeep Doshi, Director – Zebronics India says "We've been very particular in terms of upgrading our product line whether it's our speakers range or something as small as a car charger, since we believe in staying ahead with technology."

The product is available in all leading retail stores across India.

Bring the zing factor in your life with music on the Zeb-Zing trolley speaker

Make events and occasions more special with the zing factor of Karaoke and RGB lights with the Zeb-Zing trolley speaker.

Zebronics, India's leading supplier of IT peripherals, sound systems, mobile/lifestyle accessories, and surveillance products has launched Zeb-Zing trolley speaker

Kickstart a music revolution with hosting music parties wherever you go with our Zeb-Zing trolley speaker that comes with a karaoke feature so that you can host your backyard/outdoor parties with a Zing factor.

Trolley speaker Zeb-Zing comes in a trolley design with a retractable handle for ease of portability. The

speaker comes with a wired mic for karaoke, it has an LED Display, multi-colored LED lights and multi-connectivity options like BT/AUX/Micro SD/USB. The speaker also has a built-in radio to add charm to your overall listening experience.

Commenting on the launch of the product, Mr. Pradeep Doshi, Director – Zebronics India says "Portability comes easy with our Zeb-Zing trolley speaker built to add a zing factor to your everyday life."

The speaker is available in leading stores across India.

An Effective Solution for Businesses to Improve Efficiency at Managing and Collecting Receivables

Common challenges for most businesses in the Small and Medium Enterprise (SME) space are sales and managing receivables. This happens because of reasons such as everyday activities like sales and firefighting getting priority, leaders being too busy to be able to hold the responsible people accountable, and lack of tools to help leaders predict short-term cash flow.

All this means debt collection and managing receivables becomes a huge challenge to streamline for the business. The resulting lack of cash flow not only restricts the business from adding new and innovative products to its offerings but also makes it difficult for the business to remain profitable.

Despite this problem existing for over a decade, most businesses have had little choice but to put up with it every day. But not anymore.

The Integrated Receivable Management Solution

Most SMEs use Tally as an ERP-cum-CRM tool to manage accounts. While Tally has many features to manage accounts and finance, one aspect missing is the ability to predict, manage and track receivables.

Tally ERP tracks receivable based on the due date, but in India, receivables are seldom received on due-dates. There is a need for something more flexible. To address this, Enjay IT Solutions Ltd. has integrated their CRM with Tally, offering a Receivable Management System (RMS) that has turned out to be very popular among customers for various reasons. Some benefits of the RMS are:

- Real-Time Receivables Information

People managing receivables need real-time information about customers' outstanding dues and provide them with ledgers if requested. Rather than waiting to get to the office to do this, vendors can share information like outstanding amount, bill-wise charges, ledgers and more through Enjay's CRM synced with Tally directly from their mobile phones.

- Unique Receivable Dashboard

SME owners want to know, day wise receivable and person wise receivable. Person wise because there are more than a few persons responsible for collection. RMS Dashboard (on Web and Mobile) shows receivables based on expected Days, e.g. Today, Tomorrow, next 7 days, next 30 days and so on. The second dashboard shows collector-wise receivables.

- Keeping Sales Teams Mobile

Since the Receivable Management System is available on a

mobile app, salespeople no longer need to do administrative tasks like information sharing from the office. They can do so on the go and continue to do revenue-generating activities.

- Logging Follow Ups

Salespeople can log activities they've conducted to follow up on outstanding dues, and can also log actual receivables dates as against the promised dates. This enables business leaders to predict more accurate cash flow in the short term and take decisions accordingly.

- Omni-Channel Communication

The RMS tool allows users to send information from any screen – reminders, bill-wise or location-wise details, ledgers, etc. – directly through WhatsApp, email, or SMS using the party's contact details mentioned in Tally. This brings downtime spent on rework drastically

and allows people to invest in more productive tasks.

The system offers a host of useful tools and features like useful analytics, mobile dashboards, real-time data syncing, automated reminders, follow-up logs, and more.

"This is a very convenient tool for us," said Ashish Sharma, business head of Intelligent Systems Services. "The time we spent on managing receivables has halved and accountability has improved as well. More importantly, our collections have improved by 36% in the last quarter alone."

Enjay IT Solutions Ltd. co-founder and CEO Limesh Parekh prods business leaders to not take managing receivables lightly. "Think about it like this," he said. "With inflation optimistically at around 6% and the bank giving us 6% interest on our savings, each month that we delay collections means our dues lose 1% in their value. In percentage terms, this appears small. But in absolute value, imagine how large this number is for a business, and what it could achieve with these funds."

"We want to give the SME sector the technological advantages it needs to progress and scale up to the next level," Parekh said. "This is why the Receivable Management System is one of our most effective and useful tools so far."

Very big Opportunity for IT Partners, Tally Partners and System Integrators.

Limesh Parekh added "We are shortly launching a standalone app for RMS. Combined with our CRM, Tally Cloud and other Solutions, Enjay solutions offer a big opportunity for Partners. Enjay is a channel partner-focused company and we are looking forward to signing up strategic channel partners.

Summing Up

Receivable Management Solution that also doubles up as Tally on mobile is a technology that will enable SMEs to become more efficient and effective in their functioning.

Radiant Info Solutions appointed R&M's North India Distributor for SCS Business

Radiant Info Solutions appointed R&M's North India Distributor for SCS Business
Targets tier 2, 3 & 4 cities and townships

The Switzerland based network cabling giant Reichle & De-Massari, better known as R&M – who has been present in India for the past 15 years have now roped in New Delhi based Radiant Info Solution to drive their Structured Cabling System (SCS) business as their North India Territory Distributor.

“We are pleased to appointment Radiant Info as our Regional Distributor for North India for Enterprise Network Cabling

Business. With Radiant, our distribution network has become stronger, we are confident their expertise reach will help us serve more customers & grow our business manifold.” shared Mr R. Murugesan, Senior Director Sales (Private Network) R&M India, thru an email note. In a bid to make a deeper penetration and to further R&M's footprint

particularly in Structured Cabling Systems Channel business, this move was made based on Radiant's capabilities for driving channel markets as a value added IT network provider with strong support presence.

Zebra Technologies Celebrates 50 Years of Innovating at the Edge

Zebra Technologies Corporation (NASDAQ: ZBRA), an innovator at the edge of the enterprise with

solutions and partners that enable businesses to gain a performance edge, celebrates its 50th anniversary as it continues to empower the front line of business. Since the inception of its first printing prototypes in the late 1960s, Zebra has evolved into a trusted advisor to its partners and customers based on its legacy of innovation to help digitally transform the enterprise.

When Zebra and its partners deliver a performance edge to front-line employees, nurses spend more time at the bedside with a patient resulting in higher quality care, and retail associates check inventory and complete transactions without leaving the shopper's side. When Zebra integrates mobile printing and data

capture solutions with cross-technology indoor location solutions, manufacturing plants and distribution centers become smarter environments in which production, fulfillment and shipping efficiencies are dramatically increased.

“We are proud to celebrate our half century milestone with our customers across the retail/ecommerce, manufacturing, transportation and logistics, healthcare, government and other industries,” said Anders Gustafsson, Chief Executive Officer, Zebra Technologies. “While Zebra has changed its stripes over the years, we are well-positioned to accelerate our strategy. With our network of specialized partners, we will continue to deliver industry-tailored solutions at the enterprise edge where there is an amazing amount of new growth and opportunities.”

Fortinet: 6 Best Practices for Password Security

Fortinet, a global leader in broad, integrated and automated cybersecurity solutions, today reminded IT teams and stakeholders to maintain strong passwords and have a password strategy as an essential cybersecurity effort so that every employee and individual plays a crucial part in protecting corporate data.

According to the Verizon Data Breach Investigations Report, 81% of breaches leveraged either stolen and/or weak passwords. That problem is compounded because one of the biggest risks to data security is the reuse of passwords across accounts. If one of the

accounts is compromised and your user name and password are posted on the dark web, cybercriminals who know how often passwords are reused will simply begin to plug that information into other possible accounts until they unlock one that uses the exact same credentials.

This is a common risk, as 83% of people have admitted to reusing passwords across multiple sites. Even if it is safe to reuse passwords on accounts that don't house sensitive data – a breach there can be used as an entryway to move laterally across networks in search of critical business data or personally identifiable information (PII).

GIGABYTE Announces BIOS Updates For Next Gen. AMD Ryzen CPUs

GIGABYTE TECHNOLOGY Co. Ltd, a leading manufacturer of motherboards and graphics cards, has released BIOS updates for X470 and B450 AMD motherboards. With a simple update of the BIOS, users will get full support for next gen. AMD Ryzen™ processors. BIOS updates for the X370 and B350 AMD

motherboards will be released before the end of the month.

In anticipation of the release of next gen. AMD Ryzen™ CPUs, GIGABYTE engineers have successfully tested and validated GIGABYTE AMD motherboards with the newest BIOS to ensure that users have full support for their new CPUs with top notch compatibility. Users can visit the official GIGABYTE website to download the newest BIOS version (F40 and later versions), so that they can fully unleash the power of these next gen. CPUs.

“Augmented Reality & Virtual Reality are coming up with different ways to deliver engaging & interactive education like never-before.”-Ms. Kiran Dham, CEO, Globus Infocom

“Augmented Reality & Virtual Reality are coming up with different ways to deliver engaging & interactive education like never-before.”-Ms. Kiran Dham, CEO, Globus Infocom

Posted by Nisha on May 10, 2019

Nisha Harshwal-Share details about the inception of Globus Infocom?

Ms. Kiran Dham:-The idea of incepting Globus Infocom & developing it as a strong Make in India brand was to develop and build a trusted brand in Indian market which would develop and deliver hardware technological products and solutions along with the necessary required software's to offer a COMPLETE solution to the user. This has been a common problem faced by any technological user which led us to come up with this revolutionary idea to enable the user buy all the necessary products and software's under one umbrella from a single solution provider. Currently we also have a strong nationwide sales & service present to cater to the stringent demands & after sales requirements of our esteemed customers.

Nisha Harshwal:- What is your mission and vision for 2019?

Ms. Kiran Dham:- Mission: To create a technology driven ecosystem of Opportunities, Growth & Trust.

Vision: Dedicated to becoming a leading & trusted Make In India brand for innovative solutions & provide a world of unlimited possibilities for our customers, partners & team members.

Nisha Harshwal:- How Technology has transformed the Education sector in India?

Ms. Kiran Dham:- Technology has enabled education to open a world of opportunities and is accepted & practiced by teachers of most of the schools & colleges of rural, urban & semi urban areas of India. All the digital facilities are when paired with tech savvy teachers, learners get an evolve & enriched learning experience. There are many ways technology is altering the ways of education in present scenario. Technology is turning education in to a fun & interesting experience and helps break down the walls of classrooms encouraging students & teachers to think out of the box.

The increasing impact of e-learning which is providing flexible, personalized & accessible learning without any demographic boundary is significantly contributing in rise of education. Cloud based courses, data & educational content are giving wings to learners. The involvement of Artificial Intelligence & Machine

learning is elevating the education standard & also providing the ease of learning at one's own pace. Similarly, Augmented Reality & Virtual Reality are coming up with different ways to deliver engaging & interactive education like never-before.

Nisha Harshwal:- Make in India: Generating the security solutions for e-gov marketplace?

Ms. Kiran Dham:- In light of the current scenario where

security has become pre-eminent not only inside homes, offices but also at the public places, Government has been taking quite a serious approach towards the safety of the citizens of India & has started to invest in services like Mobile/Bus surveillance, Traffic Surveillance, installation of security cameras at all public places. Initiatives like Smart Cities, Dial 100, Government school surveillance initiatives have boosted the power of surveillance structure in India. Taking into consideration all these facts, Globus Infocom offers comprehensive range of surveillance solutions including best in class surveillance products & solutions integrated with high end technologies which are future ready. Our elite range of body-worn cameras & mobile surveillance solution have been designed as per the advanced surveillance needs of the environment. Laced with features like IoT, facial detection & recognition, Object counting & removal, Intrusion detection, Tail gating detection & ANPR, these are fully equipped to serve the emerging security concerns. We have successfully installed our Surveillance solutions in the eminent government establishments like AIIMS, Haryana Medical Services Corporation Limited & All central Bhawans of Government of India, New Delhi & many other prestigious clients.

Nisha Harshwal:- Education Sector at the Cusp of a huge Transformation: Enabled by Technology on 2019?

Ms. Kiran Dham:- India is currently at a stage of progressive digitization & technology is playing an integral role in delivery of knowledge. The ubiquity of digital learning aids will grow in 2019 because such aids make learning fun and easy. Many children who're afraid of complex language, graphs, diagrams, and equations on paper are more welcoming of them when they're expressed using simple audio and visual cues.

Ms. Kiran Dham, CEO, Globus Infocom

This means that there is tremendous scope to use Edtech to teach children technologies likely to enter the mainstream in the education space include VR and 3D platforms. The advantages of such platforms are they allow students to learn by immersing them in subjects. A child who's studying biology has to memorise a number of different terms using a textbook. Yet when the child is immersed in a Virtual Reality world built around biology, the task of memorising terms, names, facts, and functions becomes far easier. This is why technologies such as 3D platforms and VR are game changers in the education space and why they will continue to impact education in 2019.

Nisha Harshwal:- What are your Future Plans?

Ms. Kiran Dham:- Now after a successful foray into digital learning solutions we are planning to leverage on our comprehensive 360 degree school solutions which are designed to provide start to end solutions to cover complete need of schools, collage or educational institute. This will include software solutions like subject labs, ERP(School Management Software), language labs incorporated with our hardware products, also with complete surveillance solution which will enable

schools/colleges to not only provide a holistic & safe educational environment to students but also smoothen their operational & admin related functions. Further, we are also incorporating the futuristic technologies like Artificial Intelligence, Virtual Reality in our learning solutions to provide an immersive learning experience to students.

Nisha Harshwal:- What were the key achievements of Globus Infocom in Year 2019-20?

Ms. Kiran Dham:- In the last financial year our 20% investment was on Research & Development. We expanded our solution basket by adding need-based & meaningful technology solutions like Integrated Teaching Solution, Digital Lounge along with many content software which enabled us to become a one stop solution provider of state of the art hardware & advanced software together eradicating the challenges of customers & partners of finding correct software best suited for the hardware. We also executed many prestigious projects in education wherein we have successfully delivered different projects within the defined timelines irrespective of highly challenging locations.

Panasonic launches first of its kind EV charging service for India

Panasonic

Panasonic, a diversified technology company, today announced the launch of first of its kind smart EV charging service in India – Nymbus. A

futuristic charging service combines physical components such as charging stations, swap stations, on board charges, telematics systems and the virtual components like cloud service, analytics, intuitive dashboard, and artificial intelligence to deliver one stop solution. Nymbus, is a unique technology platform by Panasonic India's concentrated R&D efforts, designed and developed to cater to the growing mobility market in India.

As part of the first phase, Panasonic has partnered with electric mobility service providers' SmartE and qQuick, wherein Panasonic will be deploying the EV charging service on 150 SmartE electric three wheelers and on 25 qQuick 2 wheelers in the Delhi NCR region.

The solution is poised to help individual EV users, EV fleet owners, e-commerce & logistics companies to manage their fleet more efficiently and also the utility providers, vehicle, equipment and battery manufacturers to understand the user patterns and calibrate the products and services accordingly.

The service comes equipped with telematics sensors on the vehicles, allowing users to generate real time data and reports from continuous operation thus enabling them to use their fleet in the most efficient way. Built to learn and gain intelligence over time, the systems are poised to assist the fleet managers in monitoring and managing the entire fleet such as finding out the efficiency of different li-ion battery packs, avoiding unnecessary charge trips due to lack of charging and real-time data, monitoring of vehicle data usage etc. The cloud and app service also allows EV and fleet owners to easily search and navigate the nearest charging point, thus reducing logistical challenges.

Mr. Manish Sharma, President & CEO Panasonic India said, "At Panasonic, our unending quest for innovation, guided by our

philosophy of A Better Life, A Better World, inspired us to take the lead and develop this innovative EV charging solution. With the launch of the EV charging service, Panasonic for the first time is venturing into service domain in energy and eMobility we are creating an integrated common platform to cater to unsatisfied needs of multiple stakeholders and enable faster adoption of EV in the country."

Speaking about the launch, Mr. Atul Arya – Head Energy Systems Division, Panasonic India said, "Conceptualized and developed in-house, our charging service is currently meant for two and three wheelers, but we aim to expand that in the near future to other vehicles. We have currently deployed our solutions in Delhi NCR and aim to expand the offerings to Bangalore, Pune, Hyderabad, Chennai and Amaravati in the next three years and 25 more cities in the next five years (catering to) targeting approximately 1 million vehicles."

Mr. Goldie Srivastava, Co-Founder and CEO, SmartE said, "We are delighted to associate with Panasonic and have their charging solutions deployed for our electric vehicles. Panasonic's technology enabled charging service would not only help us optimize our charging infrastructure but also help achieve operational efficiencies through real time data generation. As India's largest electric vehicle operator, we look forward to a continued association with Panasonic as we work towards the common goal of building sustainable mobility solutions for the country."

Mr. Aishwarya Kachhal, Founder, qQuick said, "Our aim is to establish an integrated green mobility ecosystem for India. We are partnering with the best for making India the leader in green mobility. Panasonic is the global leader in EV solutions with its proven R&D capabilities and global experience. This partnership between qQuick and Panasonic will provide customers personal, accessible, affordable and green mobility. We look forward to establishing a long term relationship with Panasonic."

Is anyone listening in on us, Alexa?

the internet of things and play games. When we think about Amazon's Echo speakers capturing commands for Alexa, its digital assistant in the cloud, we often overlook the role that humans play in the process. But we should think carefully before bringing smart speakers into our homes, says David Vaile, Stream Lead for Data Protection and Surveillance, Allens Hub for Technology, Law & Innovation at UNSW Law.

Q: Who is listening to our Alexa conversations?

David Vaile: Amazon's Alexa voice recognition system generates sound files or recordings that, apparently, are routinely listened to by large numbers of people within Amazon, as well as contractors outside the company. These 'listeners' aren't just in the US as you might expect, but are also based in countries including Costa Rica, India, Romania, and possibly others. So, thousands of people around the world – both those directly employed by Amazon and subcontractors – are listening to our conversations.

Q: Why are they listening in to what the speakers hear?

David Vaile: Amazon offers a number of explanations, but the core reason seems to be to help improve its voice recognition system by correcting it where it gets lost. A major part of that process is based on the teams of Amazon 'listeners' transcribing and then annotating voice recordings; these are then fed back into the system. It's a form of human-assisted error correction and machine learning development.

Q: How transparent is this process of voice recording?

David Vaile: There seems to be minimal transparency in what Amazon's contract binds you to when you click 'OK' to the terms of service. There's the usual button at the end where you agree that you have read and understood the terms (even if you haven't), and everybody clicks that button. But, in fact, almost no one reads the terms and conditions – in part because they are long and written in legalese, and in part because they seem so dull.

Often there appears to be little point in reading these terms, because companies frequently leave out the most significant things – the specific details that might help you understand what it means in reality. For example, Amazon does mention that your recordings may be used for quality control and recognition-improvement purposes. But it doesn't say it has thousands of people around the world listening to you, transcribing, and passing your information between their teams when they need help, or maybe just for entertainment. Apparently, there is a control setting in the Amazon software interface that says, in effect, you can opt out of your recording being used for the development of new features. This may give the impression of a

full opt out, but it doesn't mention that Amazon may still analyse your recording for other purposes.

Q: How long are the recordings kept?

David Vaile: Amazon is operating in a zone that is pretty hard to regulate or to investigate. So, we don't know – the recordings could be kept for quite some time or they could be deleted rather quickly.

If you read the various terms of service, there is no

indication of this or many other important aspects of how they store your data. You do apparently have the option to delete recordings (which presumably works), but most people will be reluctant to take on yet another ongoing task. Also, it is unclear if you have automated options like 'delete everything after a week'. Amazon does warn that if you delete anything, your service quality may be adversely affected, which could discourage you from using this functionality.

Q: What happens to the information after it has been used to improve speech recognition?

David Vaile: We can't be sure what happens to the information. One of the problems is that Amazon makes a lot of fuss reassuring people that their privacy is really important and it takes security seriously – "Amazon knows that you care how information about you is used, and we appreciate your trust that we will do so carefully and sensibly." But on a number of these issues, it appears to be much less forthcoming than even Facebook and Google.

Facebook and Google at least make relatively full disclosure of the nature of information they hold and critical aspects like the number and type of government access requests for information they receive. Amazon doesn't break out Alexa requests in its very limited Transparency Report, and it was the last major company to adopt this practice.

Controversially, Amazon has also been quite happy to sell commercial access to another form of surveillance tool – its face recognition services – to government, and has also done so for law enforcement and intelligence purposes. There's nothing to say this voice data might not end up going in the same direction. In the US, there's a range of mechanisms through which the government can get access to the information held in the cloud there. And there are 'National Security Letters' and other restraints which can gag Amazon, preventing it from telling people why the government may require access.

BenQ, the No. 1 4K Projector Brand, Announces the Launch of W1700M and TK800M for Home Cinema and Sports Segment

BenQ, the Worldwide No.1 DLP Projector brand, announces the launch of two new 4K Home Projectors, W1700M, an upgrade of its home cinema projector BenQ W1700, and TK800M, an upgrade of TK800 sports projector.

Expanding its home entertainment line, the projectors comes equipped with the exclusive CinematicColor™ technology presenting precise color as directors envisioned and conveys true feelings to the viewers. Committed to providing a better 4K HDR viewing experience, BenQ with its latest projectors enhanced color accuracy to wider Rec.709 levels while also balancing brightness on the latest W1700M and TK800M models, bringing stunning movie and sport watching experiences to your home.

Commenting on the announcement, Mr. Rajeev Singh, Managing Director, BenQ said "BenQ continues to lead the way in delivering cutting edge solutions leveraging 4K technology with its performance-oriented projector series. We will keep embracing innovative technologies to offer the new 4K home projectors for AV professionals, home cinema users and people who are looking for big screen home entertainment, bringing the 4K HDR immersive viewing experience to life."

BenQ's 4K Projectors have secured the No.1 position in the Asia Pacific and Middle East market for five consecutive quarters. BenQ, the global no. 1 DLP projector brand, today announced that it is yet again the no. 1 projector brand in the fast growing India market with more than 42% market share during Q1 2019 as per FutureSource Consulting report. Globally, 90% of the Digital Cinemas use DLP Technology & 100% of IMAX Theatres uses DLP Technology.

W1700M – Creating better cinematic experience at home Producing 4K UHD 3840x2160 resolution with 8.3 million distinct pixels for each frame, W1700M applies new generation 0.47" single-DMD DLP technology to minimize the projector's profile, creating a sleek, compact design for modern lifestyles. W1700M utilizes exclusive CinematicColor™ technology, and delivers 100% Rec.709 precise color as directors envisioned.

XgenPlus offers unparalleled Security and Data Privacy on its Instant Messenger

- XgenPlus introduces secured and private instant messaging app for enterprises

Be it cyber attack on Wipro systems or latest breach of privacy on Whatsapp, security, and privacy to data has become the major concern today in internet space. Addressing these issues, Data Xgen technologies Pvt Ltd now ventures into yet another innovative technology—XgenPlus which offers a robust and highly secure instant messaging and collaboration platform. Newly launched Instant Messenger by XgenPlus offers unparallel security and data privacy.

XgenPlus Instant Messenger comes at a time when a cyber attack on systems has become a routine affair. After Wipro fiasco, WhatsApp admitted of a security hole in its messaging app. It was discovered that attackers were able to install surveillance software on to both iPhones and Android phones by ringing up targets using the app's phone call function.

Cybersecurity experts keep on advising users to safeguard themselves with more secure platforms.

Recognizing the rising number of cyber attacks and to deal with common vulnerabilities and exposures, XgenPlus enabled Messenger offers device-to-device encryption which secures every message and attachment with a unique key, from the time it leaves the sending device until it arrives on receiving devices.

"Built to function as next-generation messaging solutions, XgenPlus products create a real-time communication presence via a user-friendly interface of Web and mobile messaging app. XgenPlus enabled Unparalleled Data and Message Security for enterprises comes with several capabilities such as security, data protection, automatic subscription," said Dr. Ajay Data, Founder and CEO of Data Xgen Technologies.

"Users can enjoy peace of mind knowing that team or group members can communicate and collaborate securely. Moreover, enterprises can protect data and improve control between the clients and servers with industry-standard 256-bit encryption," he added.

As the leader in enterprise email with linguistic email addresses, Data Xgen's innovative solution XgenPlus delivers robust instant messaging and collaboration technology to organizations across a diverse range of industries.

BIOSTAR Launches H310MHG Micro-ATX Motherboard

• Taipei, Taiwan - BIOSTAR, a leading manufacturer of motherboards, graphics cards, and storage devices

releases the H310MHG micro-ATX motherboard. Equipped with the latest INTEL H310 chipset and 4K HDMI compatible motherboard is sure to satisfy the needs of home entertainment enthusiasts. An array of cutting-edge motherboard technology, elevates immersion like never before, with its dual channel memory interface that supports the most demanding of DDR4 memory modules, an uncompromising PCIe M.2 10Gb/s storage interface and a speedy USB 3.1 Gen 1 brings together the most asked for home theatre enthusiast features onto a single small form factor. Together with its 'granite rock'-like dependability does the BIOSTAR H310MHG bring a fusion of gaming, home theatre, and corporate business needs, within a single solution.

Trusted Platform Module Interface

Expand your horizons with BIOSTAR's use of the Trusted Platform Module format, within a small form factor solution. Tailored to your business needs, the H310MHG motherboard

improves equipment effectiveness with its emphasis on proactive and preventative maintenance, thus saving your company money from possible dropouts, breakdowns and security issues especially working in tandem with BIOSTAR TPM, making it perfect for enterprise, government and educational sectors.

At the core of every motherboard solution, is an ultra-durable motherboard socket and the BIOSTAR H310MHG has this feature and then some, with its reinforced 1151 PIN CPU socket that is capable of supporting from a simple 8th Gen Intel® Celeron processor to that of the ultra-demanding 9th Gen Intel® Core™ i9 LGA 1151 CPU then the H310MHG Micro-ATX Main System Board is proofed against redundancy for many years. This is further enhanced by the use of PCI-E Gen 3.0, is sure to bring about speedy connections to third-party desktop graphics cards and other interface devices, with reduced latency. All of the above is backed up by Intel's single chip H310 system design, combined with excellence and attention to detail, in order to promote a speedy transfer of data.

Election Byte

"The re-elected government will have a lot more on their shoulder as new India has higher expectations this term.

While digital India saw a mammoth growth in the last term, we expect the same to continue with higher investments in

CP Gurnani, MD & CEO, Tech Mahindra, said, "Spearheading the world's largest democracy is no mean feat, so congratulations

to the winning team. It is time for us to drive positive change by leveraging digital technologies and embolden India's

Neel Juriasingani, CEO & Co-founder, Dataculr –

"We welcome BJP again as the Government of India. In the past five years, the government has shown tremendous interest in the startup ecosystem of India and has made several policies to make it easier for entrepreneurs to launch new businesses and create jobs. Numerous startups have forayed into the various unexplored sectors and have given a new shape to the economy of India. Now, with BJP coming

Preloved

Mr. Yogesh Bhatia, CEO at PreLoved Device – "As a startup we are expecting a very smooth and feasible ecosystem from the coming government, so that startup like us

"While initially, India's start-up ecosystem was largely dominated by consumer-facing companies, B2B ventures are finally finding their feet now. India added 2,300 B2B start-ups

in the last 5 years. With the increased focus and support from the BJP government, we are certain that the next 5 years will bring immense opportunities and growth for start-ups in fast-growing sectors like Logistics-tech, Agritech, Fintech, and Healthtech, et al.

"The public has yet again placed its trust in the NDA Govt and allowed Prime Minister Narendra Modi to

retain his position as the torch bearer of the "Next Big Change". Experts believe that the present state of cabinet ministry will soon go through major disruption, owing to BJP's widespread victory achieved across the nation.

Speaking about developments, the IT sector is expected to

Digital India etc. Also, on the front of ease of doing business, the government took some major steps last term and we expect even simpler processes should be implemented. And finally, on the GST front, I would appeal the government to introduce simpler filing processes for startups and MSME's.

–Mr.Ashutosh Harbola, CEO & Co-founder, Buzzoka

collective dream of becoming a five trillion dollar economy. This also underscores the massive task that lies ahead of us – of shaping India's future. It's time for each one of us to step-up, collaborate and contribute towards the great India dream." –Mr. CP Gurnani, MD & CEO, Tech Mahindra

again, we foresee a multi-fold growth of the entire gamut of the startup network with all the stakeholders leveraging the change in the ecosystem. With the vision of moving towards Smart Cities, Fintech, AgriTech and Smart Industries, the government of India has been a great support for startups. "

run their business without any administrative obstacles and we welcome new government, on behalf of all startups industry."

The government should include regulations that will drive organizations to digitalize key logistics and supply chain processes. For instance, by mandating digitalization of certain key accounting, billing and logistics processes the government can ensure greater levels of compliance, at the same time organisations can improve efficiency.

We also expect the government to build integrated transportation hubs or Multi-Modal Logistics Parks that foster an invigorating ecosystem for logistics in India." - Mr.Kushal Nahata, CEO & Co-founder, FarEye

grow 10-folds, with major overhauls expected in the field of entrepreneurial and startup initiatives. The youth population, who have substantially contributed to in this political Broadway, are especially very appeased by the Govt buildup.

This time, the Modi Govt is also free from the baggage of primitive thoughts, with most of the candidates forming the cabinet lying across the younger spectrum."- Mr.Tarun Taunk,CEO, IT Voice

Quick Heal Technologies revamps its consumer offerings; launches next-generation suite of superior cybersecurity solutions

for laptops and desktops. The launch underlines Quick Heal's 25-year legacy and constant focus on innovation to design future-ready solutions aimed at providing best-in-class protection against sophisticated cyber-threats.

The launch of Quick Heal's 'Lighter Smarter Faster' suite marks a significant step in the direction of combatting the rapid evolution of the global threat landscape. In its Annual Threat Report 2019, Quick Heal reported more than 973 million malware attacks on desktops and laptops during 2018. More alarming, however, it highlighted how threats such as ransomware, crypto-miners and banking trojans have evolved over time to avoid signature-based detections and deliver advanced attack payloads on systems.

Quick Heal Technologies Limited, one of the leading providers of IT Security Solutions to consumers, businesses and Government, today announced the launch of its next generation suite of cybersecurity solutions – 'Lighter Smarter Faster',

With the launch of 'its next generation suite, Quick Heal has revamped its superior offerings which includes Quick Heal Total Security, Quick Heal Internet Security and Quick Heal AntiVirus Pro, designed to safeguard the digital lives of consumers from cyberattacks, privacy breaches and other online threats. Backed by industry-leading security technology and advanced features, the brand new range of Quick Heal solutions will go beyond the protection offered by traditional anti-virus solutions.

Kailash Katkar, Managing Director and CEO, said, "Quick Heal was founded with the promise of providing digital citizens with the best and most relevant cybersecurity solutions. In the past 25 years, we have endeavoured to uphold that promise through our commitment to innovation. The launch of the 'Lighter Smarter Faster' range is another step towards protecting consumers from new-age threats in the cyber space with state-of-the-art technologies. We remain committed to ensuring the safest digital experience to digital citizens through our range of cutting-edge security offerings."

Adata Launches HD710 Pro a Powerful hard drive that keeps your data safe and secure

ADATA Technology, one of the world's largest vendors of DRAM Modules and USB Flash Drives launches HD710 Pro hard drive which will keep your data from getting damaged. If you need a backup for your digital data, the external hard drives are your best bet. It is an indispensable device in today's information age.

External hard drives are portable and can help to transfer huge amounts of data from one place to another. However, data in the hard drives can be damaged if they are dropped. But do not worry as the Adata HD710 pro external hard drive offers complete

protection from shocks if dropped from height. The hard drive has three primary layers of tough silicone coating, strong shock absorbing buffer and a robust plastic shell that will hold the device completely in place.

The information in the hard drive can be lost if it comes in contact with water. Hence, it becomes important to choose a hard drive that is rugged and can give you that extra bit of protection to keep your data safe in any kind of environment, so keeping the customer's convenience in mind it is made water resistant and dust-proof.

The Adata HD 710 pro has a convenient storage feature for the detachable USB cable. This can prevent the cable from getting misplaced or cluttered. So no more loss of data or damaged hard drive. Adata is one of this year's receivers of awardees of the prestigious Taiwan excellence awards, the highest mark of excellence in innovation, offered by Bureau of Foreign Trade supported TAIITRA.

Pebble introduces its very fashionable 'BassX Extreme Speaker' with deepest bass performance, priced for Rs. 3499/-

Pebble, one of the fastest growing Lifestyle Accessories Brand, announces aggressive route to Speaker Market with BassX series, the first being, 'BassX Extreme' Bluetooth Speaker. The fashionably designed speaker promises Good Looks with Good sound that produces the most earth-shaking Bass.

Adhering to the modern design trends, Pebble BassX is practically designed like a handy bag, with an extremely durable IPX4 waterproof casing (Water resistant). Whether you're listening to tunes indoors or outdoors, entertainment remains unadulterated even on a rainy day or at poolside party. Pebble BassX itself has a rubbery material

surrounding the speaker enclosure, along with a nice grip handle at the top for easy portability. The super-portable, speaker can easily be stashed in a purse, backpack or suitcase, to get every party started!

With no tangled wires, Pebble BassX speaker brings 360 surround sound experience. Delivering not just Sound, radiators for high-quality sound that's loud enough for any party. The sound quality at 10W RMS is crystal clear and very pure, with crisp highs, detailed midranges, earth-shattering bass and plenty of depth. The bass from the speaker sounds full, rich and very deep that brings punchy beats that hits hard and tight without sounding bloated or muddying into the midrange frequencies.

Portronics Launches "iTrack 1"; World's Most Affordable Tracker

Portronics, a prominent leader in the innovative and portable digital product market has launched - iTrack 1, one of the most amazing two-way anti-lost cum key-finder.

In today's lifestyle with plenty of hustle-bustle, one might tend to lose or misplace any important valuables like wallets, mobile phones, and home or car keys. Considering the fact what if the young children or pets wander away in a park or in a shopping mall which can cause a tremendous amount of detrimental effect. For such situations/scenarios, Portronics has come to the rescue and has brought in, iTrack 1 device - a small,

smart and reliable solution for such problems. iTrack 1 is a multi-purpose device that offers two-way anti-lost function, a key-finder function and a Remote-Camera Shutter function. One just needs to pair "TRACKFAST" app available on Play Store and App Store available for Apple or Android phones.

Functionality and Features:

Object Finder Function:

After pairing with Smartphone, one just need to physically attach iTrack 1 to any valuables like wallet, keychain, or handbags that you want to track (if lost). If the valuable is misplaced, you just need to press the "TRACKFAST" app button on your paired Smartphone and the device will start transmitting the audio signal.

Supertron signed up with Optoma Projector for Pan India Distribution

Leading IT Distribution Company Supertron Electronics Pvt Ltd. has acquired yet another exclusive distribution right of world leading Projector brand Optoma. It is a world leading, and award winning projector brand globally.

Optoma has focused on projection system development and marketing since it was

established. With full competency of resource distributing and controlling in the value added chain, Optoma is the true pioneer in the world of projection technology. Optoma Projector stands at #3 positions in India.

Optoma market their range of Projectors in India through Supertron Electronics Pvt Ltd. who will be offering the product across their 34 branch offices in India through its vast and dedicated channel Network.

DIGISOL Introduces its first PoE+ Cat 6 Solder-less Patch Panel under the “Enterprise Cabling Series”

DIGISOL Systems Ltd., a leading provider of IT Networking products, added a high-performance, PoE+ compatible Cat 6 Solder-less Patch Panel – DGC-PP6U2L-1B-SL to its “enterprise cabling series”. The newly launched PoE+ Solder-less Patch Panel is aesthetically designed to handle PoE+ electrical loads and to maintain high-quality power/data transmission output.

High Performance:

The Solder-less Patch Panel consists of specially designed IDC contacts that accept wider conductor diameters (22 – 26 AWG). The patch panel's module has patented PCBs to accommodate solder-free pin and IDC mountings that make them practically immune to wide environmental variations such as temperature and humidity. It is fully covered by 30 microns of Gold over the contact pins and offers high flexibility compared to traditional stamped pins.

The patch panel features 90 degree Punch-Down design, which

makes it easy to terminate each cable separately & strongly, thus reducing the occurrence of loose connections during punch-downs & reducing human error in the termination process.

Going Solderless

The Patch Panel's solder-free design avoids use of rare earth metals and lead (Pb), which when disintegrated can soil Mother Earth. Solder-less products are more immune to oxidation thus leading to longer life and improved performance. One can get Cat 6A performance in our Cat 6 Solder-less Patch panel.

Specially designed for PoE+ applications

The high-density Patch Panel maximizes performance with PoE+ applications. The DGC-PP6U2L-1B-SL patch panel comes with contact pins assembled in Solder-less products by PRESS-FIT Technology, which helps contact pins remain shiny, results in better signal transmission at electron level. Using Solder-less patch panels and keystones help in increasing the efficiency as the Flux is absent.

EdiMax's Edigreen Air Quality Detector designed to bring high-quality life

The Edimax – Edigreen Air Quality Detector is a Smart Air Quality Detector with PM2.5, temperature and Humidity Sensors. It comes with the world's First Modular PM2.5 Sensor Design and is equipped with accurate monitoring of PM2.5, temperature and humidity that allows you to know the air you breathe.

It helps discover quality, by providing an air quality level history and trends. It also helps you analyze past readings, observe the present and alerts you when air quality is at health risk levels.

As air pollution is increasing it is causing for the increase of PM 2.5 which is one of the major air pollutants that is continuously monitored by the environment authorities across the world. It is extremely light, small and can stay in the air for a very long period of time compared to heavier air particles. According to many studies, PM2.5 has adverse effects on human health.

It can cause or worsen chronic health diseases like asthma,

bronchitis, and other respiratory problems. Prolonged exposure to PM2.5 can lead to fatal health issues.

The Edigreen air quality detector with EdiGreen Cloud also offers device tracking and enterprise-grade management system for future expansions and more Smart City applications. The real-time

air quality data is delivered to the user by the free Edigreen mobile companion app. The users can get data across different locations to understand trends and identify air pollution hot spots or observe improvements over a period of time.

NETGEAR Unveils Tri-Band Wi-Fi 6 Router with the Fastest Wi-Fi to Speed Home Networking in India

NETGEAR®

NETGEAR, the leading provider of networking devices that power today's smart home and small businesses has announced the launch of its tri-band Wi-Fi 6 routers; the Nighthawk AX4 & AX8 in Bengaluru.

Today's households are dealing with an increasing number of connected devices and an increasing demand for greater bandwidth from streaming video, audio and online gaming. Add to this the plethora of smart home devices from IP cameras, voice assistants, smart thermostats and appliances, all of which are dependent on a constant connection to the cloud. These devices just increase the complexity of a network as they compete for bandwidth, pushing wireless home networks beyond the technical threshold for the current generation of Wi-Fi. NETGEAR has solved this modern-day dilemma with the introduction of a full suite of ultra-fast Wi-Fi 6 routers.

Wi-Fi 6 – the latest generation of Wi-Fi – delivers up to four times

better performance than Wi-Fi 5 (802.11ac) using innovative technologies such as Orthogonal Frequency-Division Multiple-Access (OFDMA) to help maximize the capability to connect multiple devices at the same time, which will help reduce the congestion for the typical bandwidth starved connected home. Wi-Fi 6 will provide a huge boost in total network capacity and reliability, ushering in a new era of speed, performance and capacity for wireless networking in today's homes. The actual quality of the connection for each Wi-Fi device will also be improved by reducing the interference between them, thus ensuring that the experience of lag or buffering is reduced during online gameplay or streaming Ultra HD 8K/4K.

Speaking at the launch, Marthesh Nagendra, Country Manager – India & SAARC, NETGEAR added, "With the increasing number of Wi-Fi devices in our home network, it is has become critical for NETGEAR to provide a solution where each device gets the Wi-Fi bandwidth it needs so that you can get the quality connected experience that you deserve."

"The NETGEAR AX Nighthawk delivers super-fast Wi-Fi with better coverage and, more importantly, has the power and capacity to handle the dozens of devices in the typical congested smart home," added Nagendra.

Tenda showcased a wide array of networking solutions at Secutech India 2019

Tenda, a leading global vendor of networking devices participated in the 8th Annual Secutech India 2019; wherein it exhibited its products, solutions, and innovations that have been designed to bring in more security to the customers. The 8th edition of Secutech was held at the Bombay Exhibition Center, Mumbai, India from 25–27 April 2019.

Advanced technology and a constant demand for security measures in India have led to an increase in demand for advanced solutions across all the segments of the market. Secutech India is the place where top brands, industry leaders, and top buyers come together and witness the latest innovations and vertical solutions for the safety sectors in one of the world's key markets. Extending its reach, Secutech India was yet again able to reinforce its position in the Industry with its Eight Edition in 2019. Secutech India and Fire & Safety India attracted visitors from all parts of India and across the globe and served as the sourcing hub for dealers, distributors, system integrators, installers, chief security officers, chief fire officers and security-fire safety heads who are in search for innovations and technologies focusing on IBMS, Smart Cities, Home Automation, Surveillance Solutions, Advanced Fire Protection Systems, and IoT applications.

The wide range of products exhibited by Tenda included Home Router Series that included all the star performers of Tenda like N301, F3, F6, AC5, AC10 and AC15. The mesh duos Nova MW3 and Nova MW6 captured a lot of attention due to the increase in smart homes and wider requirement of Wi-Fi. Tenda also showcased WiFi adapters, W311MI and U3; WiFi extenders A301 and A9; a wide series of unmanaged and PoE Switches; Access Points, I9, I21 and W6-S; Gateway Router, G3; Access Controller M3; and ADSL, D303.

Outdoor and Indoor CPE O1, O3 and O6 were of key interest for all the System Integrators who were looking for a lift security solution, the 4G-Sim router, 4G680 got a good response as well due to its affordable price point. The W15E hotspot load balance router was of equal interest to people building case

Tenda®

Wi-Fi or public Wi-Fi zones.

Tenda left no stone unturned when it came to offering reliable and affordable networking solutions to everyone present at Secutech India. And judging by the tremendous response Tenda got on all the days of the event one thing is sure that whatever Tenda had to offer people accepted it wholeheartedly, and this is and will always be a source of inspiration for future planning in Tenda.

Engineers At UNSW Discover New Fidelity Technique To Test Quantum Computing Accuracy

Global tech giants Google, IBM and several others are using tens of qubits to prototype quantum computers. Comprising qubits, also known as quantum bits, quantum computers are used to perform a series of

calculations. In its present developed state, researchers are actively focused on the use of technologies like – trapped ions, superconducting circuits and semiconductor quantum dots to create the best qubits. After years of significant R&D undertaken by the computer industry, silicon has been found as the ideal material to build and integrate electronic devices.

Drawing on this, The University Of New South Wales' approach has been to channel their energies into making qubits out of single atoms of phosphorus or quantum dots in silicon – the material that forms the basis of today's computer chips. Back in 2015, researchers from the University discovered the way to enable quantum computer coding in silicon. Thus, they unveiled its achievement of having built a quantum logic gate in silicon, thereby making calculations between two qubits of information possible.

Following up on this quantum computing breakthrough, engineers from UNSW have announced that they have measured the accuracy of silicon two-quantum bit (qubit) operations for the first

time. With the university having measured the fidelity of two-qubit logic operations in silicon, its results have affirmed these of silicon for quantum computing.

While researchers/teams across the globe have demonstrated two-qubit gates in silicon, UNSW revealed that the true accuracy of such a two-qubit gate was yet to be found, until its landmark achievement.

UNSW Scientia Professor Andrew Dzurak said, "All quantum computations can be made up of one-qubit operations and two-qubit operations – they're the central building blocks of quantum computing." Once you've got those, you can perform any computation you want – but the accuracy of both operations needs to be very high."

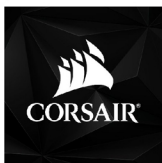

The University also revealed that while conducting its study, Clifford-based fidelity benchmarking was performed to assess qubit accuracy across technology platforms. The result was an average two-qubit gate fidelity of 98%.

Dr Henry Yang, a senior research fellow at UNSW said, "Fidelity is a critical parameter which determines how viable a qubit technology is – you can only tap into the tremendous power of quantum computing if the qubit operations are near perfect, with only tiny errors allowed." Dr. Yang conducted the experiment with Wister Huang, final-year PhD student in Electrical Engineering.

CORSAIR Launches Two New High-Performance Gaming Mice – IRONCLAW RGB WIRELESS and GLAIVE RGB PRO

CORSAIR®, a world leader in PC gaming peripherals and enthusiast components, today announced the addition of two new high-performance mice to its rapidly expanding gaming peripheral lineup. IRONCLAW RGB WIRELESS, a wireless version of the acclaimed IRONCLAW RGB

launched in early 2019, uses hyper-fast SLIPSTREAM CORSAIR WIRELESS TECHNOLOGY alongside an 18,000 DPI optical sensor to provide gamers with cutting-edge wireless performance and superb accuracy and tracking. GLAIVE RGB PRO sees the popular GLAIVE RGB, featuring three interchangeable side grips, updated with a new 18,000 DPI sensor and additional RGB lighting. Whether gamers choose the wireless freedom and palm grip-friendly shape of IRONCLAW RGB WIRELESS or the customizable grip of GLAIVE RGB PRO, they'll find a CORSAIR mouse that elevates their gameplay and in-game performance.

IRONCLAW RGB WIRELESS retains the palm grip-optimized shape and rubberized side of the wired version, while adding CORSAIR's industry-leading 2.4GHz SLIPSTREAM WIRELESS.

With unbelievably fast sub-1ms wireless latency, a wireless range of up to 33ft, and Intelligent Frequency Shift (IFS) ensuring a stable signal even in heavy wireless traffic, SLIPSTREAM WIRELESS offers a wired mouse gaming experience, without the wire.

In addition to SLIPSTREAM WIRELESS, the IRONCLAW RGB WIRELESS can also connect over low-latency Bluetooth, providing a wealth of connection options for many devices from laptops to tablets. Connecting with USB wired allows for simultaneous use while charging, and with up to 50 hours of rechargeable battery life, users can play for days at a time on a single charge.

IRONCLAW RGB WIRELESS also adds an additional three buttons over its wired counterpart, for a total of ten fully programmable buttons, as well as an additional RGB lighting zone for three zones of dynamic RGB backlighting and greater customization. IRONCLAW RGB WIRELESS boasts the same top-end 18,000 DPI Pixart optical sensor and ultra-durable Omron switches as the IRONCLAW RGB, ensuring tracking, accuracy and precision equal to even the most advanced wired mouse

TALLY ON CLOUD

“Get Free Demo”

Only.
₹33/day

“Your business runs on tally,
make your tally run on our cloud”

TALLY ON CLOUD

Deploy and run Tally on the most Scalable and Compliant enterprise cloud platform with Contech, India's Tally on Cloud. It allows you to Maintain, Secure, Update and Access mission-critical financial data in Tally from anywhere and anytime.

Features

- Access From Anywhere
- Access Anytime
- Any Device
- Supports all Tally Versions
- Own your data
- Seamless Printing
- Easy Backups
- Printer on Cloud
